

## **Chassis**

1. Engine must remain in original locations and held rigid to OEM chassis.
2. Stock transmission housing and stock final drive housing must be used.
3. Tractors must have hood and grill in place as intended by the manufacturers and be stock length and in stock location.
4. Sheet metal may be upgraded but cannot cross original manufacturers lines. All rules apply to original model number of that tractor.
5. Maximum of 114 inch wheelbase, unless originally produced with longer wheelbase, then must remain stock length. Maximum length 13' from center of rear wheel to forward most portion excluding tow ring.
6. All tractors shall have wide front axles. Front wheels shall track within the rear wheels.
7. Tube frames will be allowed but must be covered by .060 inch thick metal or aluminum in engine area.
